

FROM A GRATEFUL GRANDMOTHER

Jean Hamburg's "Cooperation Counts" plan has dramatically changed my grandchildren's and their mother's lives. After 4 years of searching for the "right method" or for an effective family therapist, they've finally found the complete package with the implementation of "Cooperation Counts". Endless power struggles, anger, frustration, and other possible daily life disasters have been minimized. A sense of respect, calmness and kindness has been brought back into their home. This plan is a direct, easy, and most importantly, an enjoyable system for a family to implement with lasting healthy and positive results.

As mentioned, Jean Hamburg's methods have been a life-saver for my daughter and grandchildren. My only regret is that this plan had not been developed when raising my own 2 children and during my 35 years as an elementary schoolteacher. I look forward to being with my grandchildren every week; now our time together is without conflict, power struggles and battles . Our time together now is so enjoyable and peaceful. I personally feel more confident , kind and competent when caring for my grandchildren. I strongly recommend Jean Hamburg's plan to anyone working or living with kids.
